MESSAGE FROM ■ MANAGING DIRECTOR

“

Moral Fashion Ltd Born with a dream to be the leader of apparel manufacturing sector and we with our dedicated ex-parties team working heart and soul to fulfil this dream.

Welcome to Moral Fashion Ltd, a modern setup for basic and fancy knitwear located at Kuturia, Dewan Market, Ashulia, Dhaka-1344, Bangladesh. We offer high quality products at a very competitive price and guaranteed for on time delivery. We have an experienced and expert production team, speedy sampling service with a strict quality control system. We are BSCI –audited factory, which ensures and improves social performance as well as monitor working conditions. We manufacture and export all kind of knitted items including babywear, men and women top and bottom.

ABOUT THE COMPANY

WELCOME TO MORAL FASHION LTD

Moral Fashion Ltd. is one of the leading manufacturer and exporter of knit garments in Bangladesh. Exporting knitted readymade garments since October 2011 with a well organized professional team. Our major market is in Europe, USA and Canada. We are committed to ensure the quality and maintaining the lead time. Our merchandising department can ensure very competitive prices for all kinds of knit garments. By having knitting and sewing units under the same roof we are able to satisfy large scale orders to our buyer made specifications. In addition to this we have our own knitting & printing units under the same management, to give our products the ultimate finish. Established in Feb 2011 the Moral Fashion Ltd. is located at 39, Kuturia, Dewan Market, Ashulia, Dhaka-1344, Bangladesh with a total factory space of 30,000 sq.ft. . Our main exports include t-shirts & polo shirts for men, ladies and children's knitwear in a huge range of fabrics and colors.

To ensure our products are made with the highest attention to detail, we invest heavily in our staff. Their safety and social welfare is one of our highest priorities. The factory is equipped with the state of the art firefighting equipment and fire alarm systems, drinking water facilities and dining rooms, and first aid facilities. We also have a day-care center for our employee's children. Our thoroughly modern approach to production, along with the fact that our factories are equipped with the latest internationally made machinery, ensures that our export quality goods can meet the fashion demands of high streets around the world. For your enquiry please contact with your product details, so that we can offer you our best price. We assure you timely delivery, competitive price & quality product.

TOTAL							23 Set	

The Sample Section is well equipped & there are adequate numbers of Auto trimmer sewing machines, cutting machines & Ironing. Our sample technicians are well educated & have long experienced in relevant field of sample development.

We shall soon implement CAD guided marker system for more efficiency.

The cutting section is well equipped & Fabrics are cut with laser sharp Cutting Machines. Fabric is inspected roll to roll before trial & bulk cutting. GSM is tested prior start the cutting with digital GSM scale. Shade is tested under natural day light & under light box. Batch to batch shade difference are strictly checked & solved. High lay is avoided for accurate measurement & precession cutting. We shall soon implement CAD guided marker & automated cutting system.

Our Sewing lines are equipped with state of the art brand new JUKI machines imported from Japan. The floor is continuously kept clean and proper ventilation system and good number of ceiling and exhaust fans keep inside environment hygienic. Lighting is always checked with Lux meter. Electrical lines are installed by Bars-bar. Centralized audio system is used for announcement. Adequate fire extinguishers are placed at standard interval for facing any emergency. Single long table garment passing system installed for faster production.

The Finishing Section is at a separate side of the building. It is well partitioned from other sections and proper dry and clean environment is ensured. Adequate numbers of fire equipment are placed on equal interval. It is situated on the same floor therefore finished cartons are quickly taken to transport area for delivery. Packed cartons are shifted to finished carton warehouse which is at the same floor just besides transport parking.
